

JOIN the WMO live feed of alerts/warnings (How-to and Faqs)

- Have a country editor for your country page of the "[WMO register of alerting Authorities](#)".
- The editor edits the country page, and provides web address (URL) for your warnings in XML format.
This could be an RSS, atom etc feed for the warnings. The warnings may be in the Common Alerting Protocol (CAP) format or any other XML format.
- For more information (including how to become an editor for the Register), please contact smuchemi@wmo.int CC:webmaster@wmo.int.

FAQs:

Please note

1. Most RSS feeds from our widget are already provided on relevant Members' website in xml format with just a few exceptions.

Users can easily capture the CAP alerts from Members' websites. For users from general public, private companies and met services please refer to the "[WMO Register of Alerting Authorities](#)."

2. The alerts/warnings widget is in beta version, and some customization was made for the data used in the widget.

3. API is not available for the moment, and there is no plan to develop any yet.
